One lab.
Distinct ways to explore.

Use the parent identity for the research lab, Security for repository reviews and threat intelligence, and Physics for interactive models and learning. Preserve the outlined shared mark and wordmark geometry.

midkernel_

Midkernel

An institutional research lab. Neutral actions, clear hierarchy and two equally visible fields.

void	panel	text	control-border	lab-primary

Light #E6E8EA	Light #FFFFFF	Light #0B0D10	Light #7A828C	Light #0B0D10

midkernel_ security

Midkernel Security

The terminal identity: precise, dense, inspectable. Phosphor highlights an action; evidence remains real.

void	panel	text	control-border	phosphor

Light #E6E8EA	Light #FFFFFF	Light #0B0D10	Light #7A828C	Light #457000

midkernel_ physics

Midkernel Physics

Colorful and playful for curious learners with physics and mathematics foundations. Explore a model, then follow the explanation.

Use the right asset

All exported assets are listed with their identity, checksums and intended use in assets.json. Use a dark lockup on a dark surface, a light lockup on light surfaces, and mono on unknown imagery. Do not redraw or retype the wordmark. Keep one kernel square of clear space.

Physics illustrations are explanations, not product screenshots or measured results. The orbital, scattering and spin art preserves its source colors. Solar System and lensing art are schematics, not to scale. Native app icons and frozen scientific releases remain unchanged.

Read the full implementation guidance in the source repository. Text needs 4.5:1 contrast, controls and focus need 3:1, targets are at least 44px, and reduced motion is respected. Physics typography uses self-hosted Manrope 400–700; warm paper, deep ink and violet actions pair with bright topic surfaces and dark ink labels. Physics motion uses short entrances, meaningful six-to-eight-second model stories, manual pause and static reduced-motion alternatives. Scientific stages and their colors stay fixed. Security typography remains unchanged; Security UI uses JetBrains Mono. Included fonts carry their OFL licenses.
